PRODUCTION WORKFLOW

Episode Production Steps (Episodes 5-10)

- Step 1: Generate Destination Poster (Gemini Image Generation)**
Using destination poster prompt - this becomes PRIMARY REFERENCE for all 5 images
- Step 2: Generate 5 Images (Gemini Image Generation)**
Image 1: Arrival | Image 2: Climbing | Image 3: Standing | Image 4: Understanding | Image 5: Victory

- **Step 3: Generate 5 Videos (YouTube Video Generator)**
8 seconds each, with character dialogue and subtitles
- **Step 4: Generate Background Music (Suno AI)**
One 40-second continuous track for all 5 videos combined

STRATEGIC IMPROVEMENTS (Episodes 5-10)

1. Character Personality Differentiation

Aarav: Action-oriented, logical, encourages action. Aaravi: Emotionally intuitive, aesthetic awareness, spiritual sensitivity. Aaru: Simple words, emotional confirmation, curiosity

2. Mystery Hooks & Cliffhangers

End each episode with a question from Aaru that creates anticipation for next episode. Build running theme across Episodes 5-10: 'Why do wonders teach about LOVE?'

3. Aaru's Expanded Role

Give Aaru actual spoken words (not just sounds). Make Aaru the emotional barometer and mystery questioner. Aaru asks: 'But why?' to drive deeper understanding

4. Destination-Specific Cultural Moments

Add 1-2 lines of local cultural context per episode. Characters acknowledge/respect local culture and history

5. Multi-Language Subtitles

For each episode, provide subtitles in: English, Hindi, Malayalam, Spanish, Portuguese, Japanese

SOCIAL MEDIA POSTING SCHEDULE

Posting Schedule: Monday, Wednesday, Friday (3 episodes per week)

Platforms: Instagram Reels, TikTok, YouTube Shorts, Facebook, WhatsApp Status

Social Media Strategy

- Post destination poster 1-2 days BEFORE episode
- Caption includes mystery question and cultural context
- Episode caption includes call-to-action (guess what happens next, tag a friend, etc)
- Use hashtags: #MysteryQuest #WorldWonders #KidsLearning #TravelWithAaarav
- Add end card with 'NEXT EPISODE [DATE]' before fade out

IMPORTANT NOTES & CONTINUITY TIPS

Character Consistency

ALWAYS use the destination poster as reference when generating images. Characters must be identical across all 5 images in an episode.

Image Generation Platform

Use GEMINI for image generation (not ChatGPT). YouTube's video generator accepts Gemini images but rejects DALL-E/ChatGPT images.

Video Generation Platform

Use YouTube's video generator (built into YouTube Studio). It works seamlessly with Gemini-generated images.

Subtitle Creation

YouTube's video generator includes subtitles automatically. Ensure dialogue is clear for accurate captions.

Video Editor Integration

If using Canva/CapCut: Import 5 videos sequentially (3s poster + 5×8s videos = 43s total), add background music at 40-50% volume, export.

Quality Checklist Before Posting

- Character faces match destination poster exactly
- Aaravi height is at Aarav's eye level (or slightly lower)
- Aaru tail is visible and long/striped
- Aaravi flowers are destination-specific (not jasmine)
- No episode titles on video images (logos only)
- Dialogue is clear and audible
- Subtitles are accurate and readable
- Background music volume is 40-50%
- Total duration is correct (43s for episodes 5-10)

NEXT STEPS

- Generate Episode 6 destination poster (Peru - Machu Picchu)
- Generate 5 images using destination poster as reference
- Generate 5 videos using YouTube video generator
- Generate 40-second background music (Suno)
- Add music to videos (40-50% volume)
- Quality check all elements
- Post to all platforms
- Repeat for Episodes 7, 8, 9, 10
